## EDUCATION

### Temple University

*Bachelor of Science in Computer Science*

Philadelphia, PA

*Expected May 2028*

### Community College of Philadelphia

*Associate of Science in Computer Science*

Philadelphia, PA

*May 2026*

## EXPERIENCE

### Naval Information Warfare Center (NIWC)

*Software Engineering Intern, Incoming*

Summer 2026

*Philadelphia, PA*

- Selected for a return internship based on prior performance and technical growth.
- Supporting software development and testing efforts for mission-critical government systems.
- Collaborating with engineers and technical teams in an Agile development environment.
- Applying software development, testing, and problem-solving skills to real-world projects.

### Naval Information Warfare Center (NIWC)

*Software Engineering Intern*

Summer 2025

*Philadelphia, PA*

- Tested and validated software applications used to support government and defense systems.
- Developed automated test scripts using Cypress to verify application functionality and reliability.
- Identified, documented, and tracked software defects throughout the development lifecycle.
- Collaborated with software engineers and project stakeholders to improve software quality.
- Participated in software testing, troubleshooting, and quality assurance activities.

## PROJECTS

### Personal Portfolio Website | *React, Node.js, Express.js, MongoDB, Docker*

2026

- Designed and developed a full-stack MERN application from scratch.
- Implemented complete CRUD functionality using React, Express, Node.js, and MongoDB.
- Built RESTful APIs for managing project data and application workflows.
- Integrated MongoDB database for persistent data storage and retrieval.
- Containerized the application using Docker and Docker Compose.
- Improved user experience through form validation, loading states, and responsive design.

### Database Design Projects | *SQL, MariaDB, Database Modeling*

2025 – 2026

- Designed relational database schemas using normalization principles through Third Normal Form.
- Created ER diagrams, relational schemas, and data dictionaries for business scenarios.
- Developed SQL queries, joins, stored procedures, and functions using MariaDB.
- Applied entity integrity and referential integrity rules to database designs.

## CERTIFICATIONS

### Full-Stack Web Development Bootcamp

*Certificate of Completion*

2024

## TECHNICAL SKILLS

**Languages:** Java, JavaScript, Python, Swift, SQL, HTML, CSS

**Frameworks and Technologies:** React, Node.js, Express.js, MongoDB, Docker, Cypress

**Developer Tools:** Git, GitHub, VS Code, Postman, Docker Desktop, MongoDB Compass, MariaDB

**Coursework:** Data Structures and Algorithms, Database Management Systems, Discrete Mathematics, Software Development
